

Dear FDA,

I am, writing to express my concern over the FDA's regulation of genetically engineered (GE) food, to ask that the agency's current policies be changed, and to support all the points in docket # OOP-1211/CPI, specifically:

All GE foods should be labeled so I am informed and have a choice.

• GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing.

• There should be a moratorium-on GE foods and crops until long term studies shdw they are safe for human health and the environment.

Additional Personal Comments:

As a 12 yr. breast cancer survivor,  
I will NEVER buy GE Food knowingly, let alone  
put it in my body. PS
